START HERE

The Staircase of Intelligence

Predictive → Generative → Agentic AI. Understand how our questions for machines have evolved across three distinct tiers.

Beyond the Chatbox

The paradigm shift from generating words to executing actions. Traditional AI vs Agentic AI — passive assistant vs autonomous actor.

Core concepts

FOUNDATION

What is Agentic AI?

Agents observe, think, and act in a continuous loop. They use external tools, memory, and autonomy to solve complex tasks.

Free | Beginner

INTERMEDIATE

How Agentic AI Works

User Goal → Plan → Tool → Result. A four-step pipeline: user sets the goal, agent plans steps, calls tools, returns results.

Free | Intermediate

ADVANCED

WebMCP – The Digital Menu

Teaching the web to talk directly to AI. Websites hand agents a structured menu of functions — no guessing, no broken clicks.

Free | New | Advanced

Build with Google tools

TOOLKIT

Google Agent Development Kit (ADK)

Google's open-source toolkit for building AI agents. Works seamlessly with Gemini models, manages complex agent workflows, and connects to Vertex AI, Memory, and External Tools.

Free | Developer | Open Source

WORKSPACE

Google Antigravity – Agent's Office

A collaborative digital workspace — not just a code editor. Human's Desk for direct control, Agent's Desk for autonomous background tasks.

Free | Preview | Intermediate

💡 PRO TIP

Build one agent at a time. Pick a real problem you face. Apply the Observe → Think → Act loop. That's how it sticks.

⚠ COMMON MISTAKE

Skipping Predictive and Generative AI basics. Without the staircase foundation, Agentic AI concepts won't click.

HOW I'D START TODAY

1. **The Staircase**
   Understand the 3 AI tiers first.
2. **What is Agentic AI**
   Learn the Observe-Think-Act loop.
3. **Build with ADK**
   Create your first agent with Google's toolkit.

BEGINNER → BUILDER

1. Start at g.co/solution-challenge
2. Watch the Staircase slides
3. Install ADK locally
4. Don't just read — **ship an agent**
5. Submit to Solution Challenge 🚀

Start here: g.co/solution-challenge → Sign up free → Pick a concept → Build an agent.
