Hey,

Registrations for the **Solution Challenge 2026 India - Build with AI** is officially LIVE!

We are reaching out to invite you to support the **Solution Challenge 2026 India - Build with AI**, organized by GDG on Campus India in collaboration with Hack2skill. This isn't just about writing code; it's about writing the future.

This year, we are breaking the mold. We are thrilled to announce that the **Solution Challenge 2026 will run in tandem with the "Build with AI" campaign!**
This means you won't just be solving problems, you'll be solving them with the most advanced intelligence on the planet.

What is Solution Challenge?

The Solution Challenge is a premier global stage for student developers to tackle the world's most pressing issues using the power of **Google technology.**

By stepping into this challenge, student developers aren't just building an app; they are building a future. They will:

- **Master In-Demand Skills:** Get hands-on with Gemini, Antigravity, Flutter, and Google Cloud.
- **Create Social Impact:** Align their project to solve real-world problems.
- **Launch their Career:** Gain invaluable experience, boost their portfolio, and earn global recognition from Google experts.

Who can participate?

This challenge targets student developers from India, who are currently enrolled in college/university and their age must be 18 years or above.

Ways you can support

- Raise awareness about the Solution Challenge (Using Social Kit provided below) within your networks and inspire student developers to participate.
- Motivate student developers to address real-world issues through innovative solutions using Google technologies.
- Showcase the benefits of participation, including mentorship opportunities, skill development, and the 10 lakhs INR prize pool.

Timeline for Solution Challenge

Subject: Stop scrolling, start coding GDG on Campus India Solution Challenge 2026 - Build with AI is here!

Hello <<Name>>,

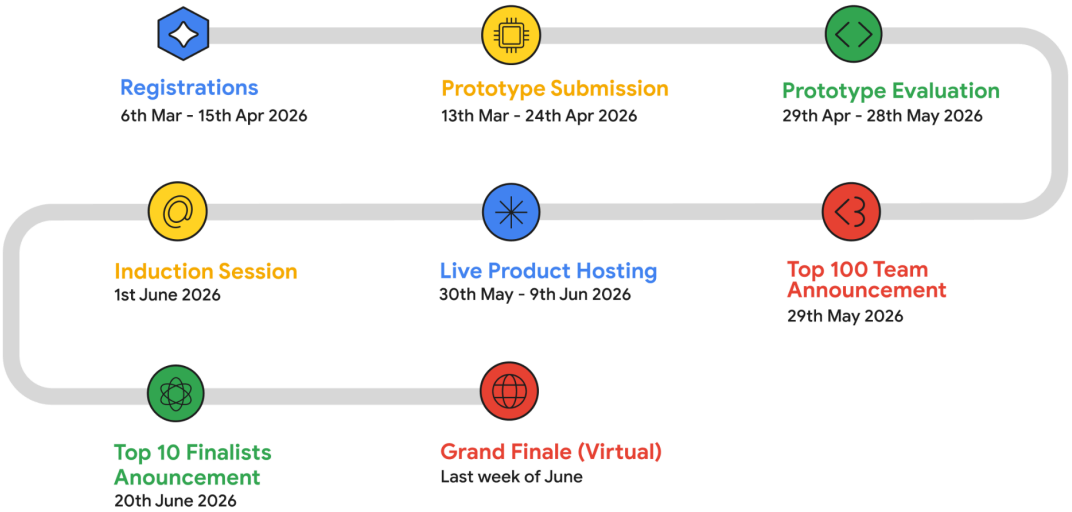
Let's be honest: our communities have bugs. We aren't talking about a missing semicolon or a broken API - we're talking about real-world glitches in healthcare, education, and sustainability that a simple "restart" won't fix.

GDG On Campus India, in collaboration with **Hack2skill**, is officially inviting you to the **Solution Challenge 2026: Build with AI.** This isn't just another hackathon to add a line to your resume. This is your chance to stop building apps that just "check boxes" and start engineering solutions that actually move the needle.

Your Mission:

Use Google technologies to tackle a local problem. Whether it's an AI that talks to plants or a platform that solves traffic woes, if it leverages Google tools and benefits humans, we want it.

The Roadmap to Glory:



*Note: Timeline are subject to change***

Why Participate? ⚡

Work on real-challenges that create an impact in the real-world.	Use Google Technologies to turn your ideas into reality.
Form a team, refine your solution and pitch it in front of the jury.	Get guidance from the industry experts and earn the chance of showcasing your project on the national stage.
